

Put a little spring in your step with Syn-flex!

Syn-flex is a liquid glucosamine (98% pure) product formulated with other natural synergistic herbs and nutrients that have been specifically designed to:

- Help soothe sore, aching joints
- Maintain joint flexibility
- Reduce inflammation
- Stimulate the production of synovial fluid
- Help maintain the health of existing joint tissue
- Aid in the rebuilding of healthy new cartilage

Why Syn-flex is Better

There are many pain relieving supplements and drugs on the market today. However, most are delivered in a powder capsule or as a compressed pill. Much of the time, the nutrients are not being absorbed either because of the delivery form (pills or capsules) or because of a compromised digestive system. This is especially

true of the elderly since digestive enzymes tend to decrease with age. However, since Syn-flex uses pure, natural liquid glucosamine, it has a 98% absorption rate for maximum bioavailability and the fastest possible relief. Best of all, there are no serious side effects such as those reported for drugs such as Cox-II inhibitors like Vioxx and Celebrex.

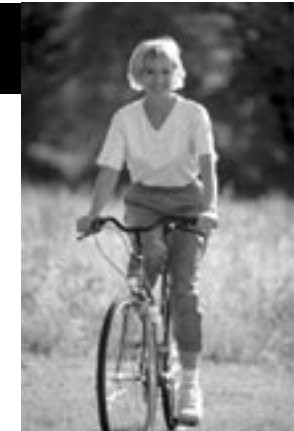

What is in Syn-flex?

Syn-flex is a powerful balanced nutritional formula that is as close to a natural food as a supplement can be.

Ingredients per ¼ oz. of Syn-flex and percentage of USRDA

1250 mg	Glucosamine HCL and Glucosamine Sulfate	*
25 mg	Shark Cartilage (20% Chondroitin Sulfate)	*
80 IU	Vitamin A	5%
5 mg	Vitamin C (Ascorbic Acid)	30%
2 IU	Vitamin E	20%
5 mg	Manganese (Ascorbate)	167%
5 mg	Omega 3 – Fatty Acid	*
5 mg	Omega 6 – Fatty Acid	*
8 mg	Boswellin	*
3 mg	Yucca Powder	*
1 mg	Bromelain	*

* RDA has not been established

Glucosamine is a natural sugar produced by the body and found in certain foods. It plays an important role in the production, maintenance and repair of cartilage. Glucosamine stimulates the production of glycosaminoglycans and proteoglycans, two essential building blocks of cartilage.

Shark Cartilage is a source of chondroitin sulfate, which is also an important element in the creation of cartilage. It drives glucosamine for maximum absorption to facilitate cartilage repair. Shark Cartilage also protects existing cartilage from enzymes that destroy cartilage and prevent nutrients from being transported to the cartilage for repair.

Vitamins A, C & E are some of the approximately fifteen organic substances that are essential in small quantities for life and health. They also act as antioxidants since they block or inhibit destructive oxidation reactions.

Manganese (Ascorbate) also assists in the processing of glucosamine. It is used in energy production and is required for normal bone growth. Ascorbate is also used in the formation of cartilage and synovial (lubricating) fluid for the joints.

Omega 3, 6 (Fatty Acids) are the basic building blocks from which fats and oils are composed. Omega 3 and 6 are essential fatty acids, which cannot be produced by the body. They are constituents of fish oils and have been shown to reduce the pain, inflammation and the swelling associated with arthritis.

Boswellin acts as an anti-inflammatory and anti-arthritis agent. Boswellic acids improve the blood supply to the joints and help maintain the integrity of the blood vessels.

Bromelain cleans away “debris” in the joints and restores proper fluid balance. In addition, it helps to inhibit inflammatory compounds reducing pain and swelling.

Yucca has a long history in easing stiff joints by blocking compounds that prevent the normal formation of cartilage. It also acts to purify the blood and is beneficial in inflammatory disorders.

What Syn-flex Does

Syn-flex is a liquid nutritional formula designed for those who suffer from arthritis induced pain and discomfort. Although there is no known cure for arthritis, it has long been known that natural nutritional supplementation can reduce joint inflammation pain and even rehabilitate damaged and deteriorated joint cartilage.

Syn-flex®

How much does it cost?

One bottle - eight (8) oz ... \$29.95 – TOTAL COST!

Shipping is **FREE** within the U.S.A. All U.S.A. destinations are priority mailed through the U.S. Postal Service. Express shipments, as well as international shipments, are charged accordingly.

A three (3) bottle pack of Syn-flex may be ordered at a ten dollar (\$10) discount with the same mailing service. All orders received before 12 midnight will be mailed the following day (except weekends).

How can Syn-flex be ordered?

Syn-flex ordering options include internet, fax, telephone and mail. Internet, fax and telephone orders must be paid by a credit card, while mail orders can be cash, check or credit card.
